

# Interested in Joining a NUCA Chapter in Texas?

At the request of utility contractors and associates, **NUCA of Texas** is being launched to advance the state's underground utility construction industry. Among its priorities, this statewide NUCA chapter will be working to ensure a more favorable business climate for the region's industry.

## → Why Join a Texas Chapter?

- It offers a forum through which Texas companies can address local concerns in the utility construction industry, including safety and governmental issues.
- It provides valuable networking opportunities for your business, as well as enables you to hone your leadership skills as a chapter officer or member. Don't miss this unique and rewarding opportunity!

## → How Else Can You Participate?

Join our **Texas Advisory Group** and help steer the direction of this newly forming Texas chapter of the National Utility Contractors Association (NUCA). We invite you to participate with Texas colleagues on our upcoming meetings and conference calls. Lay the foundation and help shape your state chapter from the start.

To express your interest, contact NUCA Texas, Kenneth Sommer, (703) 797-8219. Email: [texas@nuca.com](mailto:texas@nuca.com). Or complete this form and fax to (703) 358-9307. Check out our website: [www.nuca.com/texas](http://www.nuca.com/texas)
